Measuring Instructions

Inside Mount

*When ordered as inside mount, a 1/4" deduction will be taken on the order width. The height measurement from top of track to bottom of panel will measure 1/2" less than order height.

Outside Mount

*When ordered as outside mount, no deduction will be taken on the order width. The height measurement from top of track to bottom of panel will measure the same as order height.

How to Determine Approximate Width of Panels

*To determine approximate width of panels please use the following formula:

$$\begin{aligned} &(\text{width of track} + \text{total amount of overlap}) / \text{number of panels} = \text{approximate panel width} \\ &\text{total amount of overlap} = (\text{number of panels} - 1) \times 3" \\ &\text{For example for a One Way Track, 120" wide with 4 panels} \\ & (120" + 9") / 4 = 32 1/4" \end{aligned}$$

How to Price a Panel Track

- *First determine price of track based on size, draw and number of channels
- *Using formula above calculate the panel width to be used for your panel track
- *Multiply # of panels by the panel price, then add the track price, see example below:

$$\begin{aligned} &\text{For a 114" x 84" one way 4 channel track with 4 panels in M Screen 5\%} \\ &\text{Track Price is \$437} \\ &\text{Approximate panel width } (114" + 9") / 4 = 30 3/4" \text{ wide panels, \$154 per panel} \\ & (4 \text{ panels} \times \$154 \text{ each}) + \$437 \text{ track price} = \$1053 \end{aligned}$$
