WALDEN
PREMIER

BDD INC.
EST. 1952

ABOUT THE COLLECTION

The Walden Premier Collection includes contemporary patterns, with bamboos that have been reimagined for modern decor, woven jutes in trending neutrals and white color choices, and soft, natural fabrics.

Using natural shades in your design is a subtle way to bring the timeless beauty of nature into your space.

Shades incorporate natural fibers like bamboo, jute, and ramie into their weaves, which are selected based on color and luster. Materials are hand processed and woven into shade fabric. Finished fabrics highlight the textures, colors, and qualities of the natural materials used to create them.

After drying and quality review, fabrics are then sewn and constructed by hand into finished shades.

All the patterns in this collection can be made into roman shades. Many can be made into sliding panels or natural draperies.

Natural shades are as functional as they are beautiful with several customization options available including the ability to tailor your light and privacy preferences with various liner and shade styles.

The collection offers unique cord-free control solutions, including our patented cordless system that can lift even the heaviest shade on a 1½" head rail, as well as affordable and versatile wand control motorization option.

Our Limited Lifetime Warranty covers all aspects of workmanship and quality in your shades.

SHADE STYLES

PATTERN SELECTION

The Materials Reference table provides useful technical information about each pattern and also identifies which price chart you should use. Coordinated edge binding are also listed for each pattern.

The fabrics in this collection are made from natural materials, which are subject to variation in color, texture, and weave. Like any natural product, fabrics may show natural color changes over time.

Woven wood fabrics are not ideal for rooms with excessive humidity like bathrooms. Shades installed in these environments may bow or twist over time.

SHADE STYLES

Shades come in two basic shade styles: standard and waterfall.

STANDARD SHADES

Has a 6” valance on the front of the shade.

Valances are lined with Room-Darkening liner material to conceal the head rail components. Unlined shades will have lined valances coordinated to the shade material. Light-filtering lined shades will have lined valances coordinated to the liner material.

Standard Shade
with valance

WATERFALL SHADES

Has no front valance. The shade comes off the front of the head rail in a flat panel.

Available with back valances, which can be ordered in either the shade fabric or the liner fabric for lined shades. Back valances conceal the shade components from the back of the shade.

Available with interior valances. Interior valances come standard with waterfall shades that are unlined or that are ordered with a light-filtering liner. Interior valances block the outline of the shade components from showing on the front of the shade. Valances are 4” long and are made with coordinated liner material. *Because the valance is made with Room-Darkening fabric, the part of the shade in front of the interior valance will look darker than the rest of the shade when light is coming through.*

Waterfall Shade
without valance

BOTTOM BARS

Clutch and motorized shades will be made with a flat sewn-in bottom bar. If hold down brackets are requested, a round bottom bar will be used.

Cordless shades are made with a rectangular bottom bar. The same bottom bar is used for both shades with or without hold down brackets.

CONTROL OPTIONS

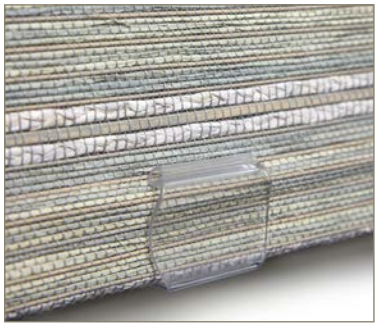
CORDLESS SHADES

Cordless shades are raised by pushing up on the hem bar and lowered by pulling down on the hem bar. A spring control system located under the wooden head rail holds the shade in place at the desired position.

Clear grips are added to the hem bar of cordless shades, one per shade up to 72" wide and two for wider shades.

Cordless shades are available up to 96" wide and 96" long and will be mounted on a 1½" deep head rail (see Specifications for details).

Cordless Shade



Clear Grip

TOP-DOWN BOTTOM-UP

Raised from the bottom or lowered from the top.

To conceal shade components, shades will be finished with a Room-Darkening lined front valance and a back valance. Back valance will match shade material for unlined shades or liner material for lined shades.

TDBU shades are not available in waterfall style, as 3-on-1 head rail, or as twin shades. Only available with cordless control.

Note: Inside Mount TDBU shades are not available to be ordered with returns. For installations where returns are required for inside mount TDBU, follow the recommendation below:

> Order shades as outside mount with returns. Shades should be ordered 1" narrower than the required width. This will leave a 1/2" gap on either side for the shade fabric, and the valance will be 1/4" wider on either side to create a clean corner with the returns. This will cause light gaps on the sides of the shade, and the factory will not take any additional deductions.

Top Down Bottom Up Shade

CLUTCH CONTROLS

Clutches provide an assisted lift for large or heavy shades and come standard with metal chain loops. Metal chain loops can be made in custom lengths.

Compliant cord tensioners are provided with clutch control shades. Cord tensioners secure the cord loop to the wall or window. They must be installed so the shade is compliant with safety regulations and operates correctly.

Standard shades ordered with a clutch come “clutch adjacent” to keep the stack of the raised shade from interfering with the loop. This means the shade fabric will be narrower than the ordered width on the control side, allowing the cord to hang to the side of the shade (see diagram). This may cause a light gap on black-out shades.

Waterfall shades ordered with clutch controls will have control loops behind the shade and are not available to be ordered as clutch adjacent.

Clutch Shade
with cord loop

Fabric Deduction

PRO WAND SHADES

Pro Wand shades are powered by a rechargeable battery motor and are operated by pressing the buttons on the wand handle, which hangs to the side of the shade.

Pro Wand is a good alternative to cordless when the window or shade size makes it hard to raise or lower the shade.

USB-C charging port for the motor battery is located on bottom of the Pro Wand handle.

Wand is only available in White.

4 available wand lengths: 24”, 36”, 48”, and 60”.

Motorized shades are mounted on a deeper head rail (see Specifications for details).

Shade fabric will be made narrower than the ordered width on the control side, allowing the wand to hang on the side of the shade. This may cause a light gap on Room-Darkening shades.

Not available to be ordered with waterfall shade styles or for shades with a movable liner.

Pro Wand

5/8” shade fabric deduction for shades without returns

7/8” shade fabric deduction for shades with returns

EDGE BINDING

Edge bindings will be sewn down both sides of the shade and valance and are not applied to the bottom of either.

All edge bindings will be approximately ½" wide on the face of the shade.

Some patterns are required to be ordered with edge binding, as noted in the Materials Reference table. Patterns that require edge binding will have the warranty for frayed edges voided if ordered without it.

Edge Binding

VALANCE RETURNS

Valance returns attach to the sides of the head rail and cover shade components and head rail from the side view. Returns can be made with the shade material or with edge binding material.

All valance returns will be made with an L-shaped connector which attaches to the back of the valance and holds the return in place, creating a clean, finished corner.

Outside mount shades are recommended to be ordered with valance returns. Returns for both outside and inside mount shades are available free of charge if requested at the time the order is placed.

Standard height will be 1 1/2" less than the valance height, keeping the rolled bottom of the valance from interfering with the return. Short valance returns are also available. They cover the end of the head rail and hide the shade components, keeping the stack of the raised shade away from the returns.

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made 1/2" deeper than the head rail and help close the gap between the wall and the back of the return.

See chart below for return specification details or diagrams on page 15.

RETURN SPECIFICATION[1]

	STANDARD SHADES	WATERFALL SHADES
Outside Mount Shades with Returns		
VALANCE	1/2" Wider than Ordered Width (1/4" wider on either side)	-

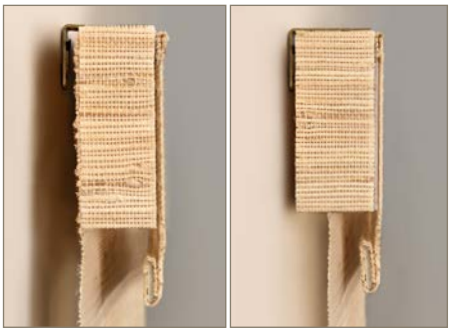
SHADE FABRIC	Made to ordered width	Made to ordered width
AVAILABLE RETURN DEPTH	Standard Depth	Standard Depth

[1]Standard shades ordered with Clutch or Pro Wand control will have control side fabric deductions, which are in addition to the deductions listed for returns.
[2]Inside mount shades will have a 3/8" overall width deduction, which is in addition to the deductions listed for returns.



Standard vs Extended Depth Return
shade fabric

Standard Shade with Return
edge binding fabric

Waterfall Shade with Return
shade fabric

ATTACHED LINERS

Attached liners are secured on the back of the shade. Shades will have liner fabric tacked to the back of the shade fabric.

If a shade is lined, the valance will automatically be lined with the same liner style and color. Unlined shades will be made with a lined valance to conceal the lift mechanisms.

Many patterns let a lot of light through and offer little privacy at night. We recommend ordering shades with liners when light control or privacy is desired.

No Liner

Light-Filtering Liner

Black-Out Liner

TWIN SHADES

Twin shades are shades with a separate, operable liner and two sets of controls: one for the shade in front and one for the liner shade behind. Controls are recommended to be on the same side of the shade.

Controls can also be a mix of cordless and clutch control. Cord loops for the liner shade will always be positioned behind the front shade.

Outside mount twin shades will be made with a valance that is $^1/_2$" wider than the ordered shade width. This will allow the returns to fit behind the valance.

Twin shades have deeper head rails to accommodate the dual sets of controls (see Specifications for details).

Twin Shades are not available as TDBU, 3-on-1 head rail, or with Pro Wand.

MULTIPLE SHADES ON ONE HEAD RAIL

Shades are available with 2-on-1 or 3-on-1 head rail. The maximum total width is 108". The gap between shades will be no more than ½". The maximum width for a common valance is 96"; wider valances will be made in sections to match the individual shade widths.

Clutches, cordless controls, and wand motorization can be used for these shades. When ordered with clutch control, pay careful attention to make sure there are suitable locations for chain tensioners when specifying multiple shades on one head rail, particularly for the middle shade in 3-on-1 head rail units.

Available for standard shades and TDBU shades. Not available for shades with a movable liner.

HOLD DOWN BRACKETS AND SPACER BLOCKS

Hold down brackets are supplied upon request for all control types.

Spacer blocks measuring 3/8" are available upon request with a maximum of 2 spacer blocks per bracket recommended. **Note:** if using spacer blocks with extended returns, extended returns do not account for the additional space created by the spacer blocks.

Hold Down Bracket

VALANCE ONLY

Valance Only is available for all fabrics.

Valances can be specified in length up to 18" long and have a maximum width of 96". Check the Materials Reference table for maximum fabric width by pattern.

Valance returns will be made to the ordered length of the valance or can be requested in custom lengths.

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made slightly deeper than the head rail and help close the gap between the wall and the back of the return.

Valances can be ordered attached to a head rail or loose. Available head rail depths for attached valances are: 1", 1 1/2", 2 1/2", 3 1/2", or 5".

Valances can be made with liners and edge binding for a surcharge. Please specify if valances should be lined or unlined and made with or without edge binding when placing your order.

SPECIFICATIONS

SLIDING PANELS

Sliding Panels are fabricated using the Absolute Panel system by Coulisse.

Sliding panels provide a clean, contemporary look for large windows and doors. Overlapping panels are suspended from hangers, which glide smoothly on an aluminum track and pass in front or behind each other, allowing panels to stack away from the window.

Panels can be pulled open and closed with a clear acrylic wand. Panels are custom-sized, based on the ordered width and the number of panels.

OPENING OPTIONS

ONE-WAY

When open, panels stack to either the right or left. ***Specify on the order to which side of the window the panels will stack.***

The standard configuration is for the back panel to be stationary and all the other panels stack in front. Reverse stacking is available, with the front panel stationary. Free-floating panels are also available.

CENTER OPENING (SPLIT DRAW)

Must be made with an even number of panels. Panels stack to both sides.

Standard configuration is the back panel on both sides to be stationary and all other panels to stack in front. 4 panel center opening can also be requested on a 2 channel track, which allows a more narrow mounting depth. See Sliding Panel Configurations on page 27.

Reverse stacking and free-floating panels are also available.

Note: If you want the panels to stack completely away from the window for an unobstructed view, allow for the panel width in the overall width of the shade. See Specifications for more details.

One-Way LEFT Stack

Center Opening (Split Draw)
shown with 2 channel track

SLIDING PANEL INSTALLATION AND CONSTRUCTION

TRACK INSTALLATION

Tracks are installed using either a top mount or face mount bracket. Both bracket options have a flange which is inserted under the lip of the track and a tab which the track snaps into to hold the sliding panel track in place.

Tracks and brackets are available in white or silver.

PANEL INSTALLATION

Panels are suspended by a Velcro top rail, which slots into the track runners. See Panel Installation on page 26 for illustration.

Velcro top rail and Runner

Velcro Top Rail

BOTTOM BAR

Sliding panels will be finished with a flat, fabric wrapped bottom bar.

SLIDING PANEL BOX VALANCE

VALANCE BOARD

Sliding panels can be ordered with a valance board, which installs above the sliding panel track. 8” valances attach to the board.

Valances can be installed either direct mount if top mounting or using an L-bracket when face mounting. Sliding panel tracks will be installed to the underside of the valance board.

Valance boards will be matched to the color of the fabric used for the sliding panel.

When ordered inside mount, valances will attach to the front of the valance board only with no returns. When ordered outside mount, valances will include enough fabric to cover the front and sides of the valance to create a clean corner.

Valances will have fabric railroaded.

The height of the sliding panel is measured from the top of the valance board to the bottom of the sliding panel. The valance board is 3⁄4” thick, and the factory will account for all required deductions.

The depth of the valance board is based on the number of tracks the sliding panel will have. See chart below.

Outside Mount Valance Board
shown with return

VALANCE BOARD DEPTH

	2 CHANNEL	3 CHANNEL	4 CHANNEL	5 CHANNEL	6 CHANNEL
Valance Board Depth	3”	3”	4”	4”	5 1/4”

192”	6 panels	34 1/8”	10 panels	21 1/2”

PANEL SIZE CALCULATIONS

Sliding panels are ordered slightly wider than required to include a 2 1/2" panel overlap allowing for privacy. Reference the table above for panel widths of select track sizes based on the configuration.

To calculate an approximate panel width, multiply the gaps between your panels (the number of panels ordered minus 1) by 2 1/2” (the panel overlap). Add this number to the overall width of your panel track. Then divide that number by the number of panels ordered.

For example: For a 96" one-way panel track, each panel will be approximately 25 7/8" wide.
4 (panels) - 1 = 3 gaps
3 x 2 1/2" = 7 1/2"
96" (ordered width) + 7 1/2" = 103 1/2"
103 1/2" / 4 (panels) = 25 7/8” approximate panel width

All panel measurements are rounded up to the next 1/8".

STANDARD PANEL CONFIGURATIONS

Track Width	Type of Opening	# of Panels	Track Type
48” - 84”	One-Way	3 Panels	3 Channel
	Center	4 Panels	3 Channels or 2 Channel*
84 1/4” - 120”	One-Way	4 Panels	4 Channel
	Center	4 Panels	3 Channel or 2 Channel*
120 1/4” - 144”	One-Way	5 Panels	5 Channel
	Center	6 Panels	4 Channel
144 1/4” - 168”	One-Way	5 Panels	5 Channel
	Center	8 Panels	5 Channel
168 1/4” - 192”	One-Way	6 Panels	6 Channel
	Center	10 Panels	6 Channel

*4 panel center opening can be requested on 3 channel (standard) or 2 channel track. 2 channel tracks allow a narrower mounting depth.

TRACK DIMENSIONS

TRACK DEPTHS	
2 Channel	1 1/2"
3 Channel	2"
4 Channel	2 5/8"
5 Channel	3 1/4"
6 Channel	4"

The distance from the top of the track to the top of the panels is 1 7/8". The factory will take account of this distance when calculating the panel length.

NATURAL DRAPERIES

Natural Draperies present a sophisticated and stylish way to cover large windows or sliding doors. When specifying, note that the Natural Drapery will include decorative track with your choice of rounded or rectangular profile. Because draperies install using a decorative track, valances are not needed for this product.

Natural material is railroaded to hang vertically when ordered in this style. Draperies require edge binding, which is sewn to all four sides to protect the edges and is included in the price of the drape.

Natural draperies are constructed using wave tape. Hooks attach to carriers, which glide smoothly in a traversing track while maintaining their structure when being opened and closed.

Check the Materials Reference table for patterns that are available to be made as Natural Draperies.

OPENING OPTIONS

ONE-WAY

Drapery is one continuous panel that stacks to either the right or left. Specify on the order to which side of the window the drapery will stack.

CENTER OPENING (SPLIT DRAW)

Drapery is two panels, which open in the middle and stack to either side.

Note: If you want the panels to stack completely away from the window for an unobstructed view, allow for the panel stack width in the overall width of the shade. See Specifications for more details.

One Way

Center Opening

INSTALLATION TRACKS

Draperies install with our contemporary decorative track, which has been specially selected to coordinate with the panels. Natural Draperies must be installed with the supplied tracks, and tracks are included in the price of the drapery.

Tracks are offered in 6 colors: Anthracite, Black, Bronze, Champagne, Silver, and White.

Tracks are offered in rectangular or round 1 3/8" profiles and will include color coordinated end caps and brackets. Carriers and hooks will be coordinated to the track color. See image captions below for color pairings.

Track installation brackets are available for wall or ceiling mount. Wall brackets are adjustable from 3½" to 5".

Aluminum batons are color coordinated to drapery hardware and are 48 inches in length. Two batons will be provided for split draw draperies.

Tracks over 94" in width will be supplied with a splice. See photo of splice on next page.

SIZE LIMITATIONS

Minimum Width: 48" Minimum Height: 24"
Maximum Width: 192"[1] Maximum Height: 96”

[1]Tracks wider than 94" are spliced to avoid oversize freight charges.

DEDUCTIONS

The ordered length of your natural drapery includes the hardware required for installation.

To accommodate the hardware, the fabric panel is made 1 1/4” shorter than the ordered length (e.g., a 96” drapery has a 94 3/4” panel).

No additional deductions are taken for outside mount.

Inside mount has the overall deductions listed below:
IB Deduction (Width): 1/4"
IB Deduction (Height): 1/2"

Spliced Track

STACK DEPTH

ORDERED WIDTH	STACK DEPTH[1]
48”	13”
60”	16 1/4”
72”	19 1/2”
84”	22 3/4”
96”	26”
108”	29 1/4”
120”	32 1/2”
132”	35 3/4”
144”	39”
156”	42 1/4”
168”	45 1/2”
180”	48 3/4”
192”	52”

[1]The stack depths listed are approximate and may vary depending on the fabric type and configuration of your Natural Drapery. For split draw panels, divide the stack depth by 2.

NOTES

WOVEN WOOD WARRANTY

LIMITED LIFETIME WARRANTY

This product is warranted against defects in materials and workmanship, provided that:

1. The product was installed according to the product instructions.
2. Manufacturer recommendations were followed regarding limitations and specifications of the product.

Manufacturer reserves the right to determine if your shade warrants a repair or partial replacement of any parts. If necessary, Manufacturer will replace your shade with a new shade of equal or superior value. This shall be your sole remedy under this warranty.

This Limited Lifetime Warranty excludes all motors, controls and accessories, which are warranted for only a period of five years from the date of purchase. Failure to follow the proper installation, charging and use instructions will invalidate the warranty for motors, remotes, wands and hubs.

This Limited Lifetime Warranty applies only to the original retail purchaser with proof of purchase.

This Limited Lifetime Warranty does not cover the removal or installation of original or replacement shades. This Limited Lifetime Warranty does not cover damage or defects caused by, or resulting from improper maintenance, neglect or improper use, wear and tear, abuse, neglect, accidents, alteration, commercial use, installation, removal or reinstallation or exposure to excessive moisture.

YOUR RIGHTS UNDER STATE LAW

These warranties give you specific legal rights. You may also have other rights which may vary from State to State. In no event shall Manufacturer be liable for incidental or consequential damages or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. These warranties are exclusive and in lieu of all other obligations, liabilities, disclaimers, or warranties.

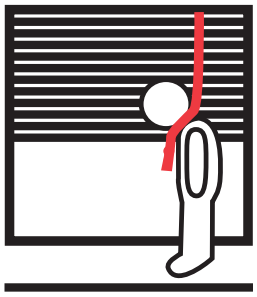
⚠WARNING ⚠ADVERTENCIA ANSI/WCMA A100.1-2022



Window Blind Cord Strangulation Risk
Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products with inaccessible cords.

Riesgo de Estrangulamiento en Cuerdas de Persianas
Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.
